## ABOUT ME

Ever since I stepped into the software engineering world, I have been infatuated with the whole software development process. The challenges it poses were exactly what I craved. Every bug lavished, and every line of code relished, I enjoy every single step of software development.

As an aspiring web developer who loves learning and solving problems, I seek always to improve and inspire both myself and the people I work with.

I work mostly on the frontend and backend, but my focus is primarily on frontend and WebGL animation.

My projects in the past range from an interactive binaural music application for Android (Java) to an e-commerce website (in progress) where I sell my own music.

## LANGUAGES

- Thai
- English
- German
- Russian

## SOFTWARE

- Visual Design
- VS Code
- After Effects
- Blender
- Figma
- Sound Design
- FL Studio
- Adobe Audition

## TECHNOLOGIES

- React
- Gatsby
- NextJS
- Styled-Components
- Chakra UI
- ThreeJS
- Flask
- Express
- Django
- TypeGraphQL
- TypeORM
- MikroORM
- GraphQL
- Apollo
- Docker
- Urql

## PROGRAMMING LANGUAGES

- HTML, CSS, Javascript
- Typescript
- Python
- SQL
- GLSL
- Java
- C

## WORK EXPERIENCE

- ASTRUM(2020): a space-themed interdisciplinary android application and website that allows the user to interact with rotating binaural sound units in real-time.
- Journeys (2020 - 2021): a Gatsby blog with a custom-made timeline and sidebar for easier chronological navigation. Written as a part of the undergraduate research.
- TripleAGloves (2021): a website for a glove company in Thailand.
- ECommerce website (2021): a website being written using Django-graphene, GraphQL, and Next.js for selling my music.

## EDUCATION

- College of Music Mahidol University 2012 - 2015
- Princess Galyani Vadhana Institute of Music 2017 - 2021

## ABOUT ME

I am an aspiring design thinker who loves engaging and has engaged in some creative works. Working as a team or in any collaborative project, I seek to always inspire and motivate both my fellow collaborators and myself; I am infatuated with the design thinking process: "How will I apply the principle that I know to this thing that I am working on?", "How can this be made more efficient?" etc.

As uncongenial as some problems maybe, I face them with full confidence, lavishing in the process; knowing full well that in doing so, I will not only have solved the problem but will also have picked up useful skills for the 21st century.

## WORK EXPERIENCE

### Inclusive Design | 2019

- Product design project for people with disabilities using the Design Thinking Process.

### JongQue Website | 2019

- Website for Day Spas and Massage Services' reservations in Thailand.
- UX, UI, and Business plan related research.
- Has collaborated with front-end developers.

### Eco-Design | 2019

- A collaborative project between Thammasat University and Nava Nakorn under the topic of "Smart City".

### Service Design | 2020

- Service design project about Health & Wellness: Clean & Co restaurant, Hair service checklist.
- Has solved Service Design problems regarding healthy restaurants.
- Research, Observation, Survey, Interview, Customer journey map, Personas, Service blueprint, Prototype, and testing.

### Internship | January-April 2021

- UX/UI Designer at Krungthai Innovation Lab

### Summer Internship | June-July 2021

- UX/UI Designer at Rabbit Digital Group

## EDUCATION

- Samsenwittayalai School 2009-2011
- Pre-college of Music, Mahidol University 2012-2015
- General Educational Development (GED) 2016-2017
- Currently majoring in Faculty of Architecture & Planning, Design, Business & Technology Management program at Thammasat University 2018 - : GPA 3.28
